SN 11/723,075
Docket No. S-102,315
In Response to Office Action dated June 27, 2007

RECEIVED CENTRAL FAX CENTER SEP 2 1 2007

LISTING OF CLAIMS

1. (Original): A hydrocarbon sensor comprising:

an electrolyte body having a first electrolyte surface with a reference electrode depending therefrom,

a metal oxide electrode body contained within the electrolyte body and having a first electrode surface coplanar with the first electrolyte surface, wherein the electrolyte body is compressed and sintered about the metal oxide electrode body for intimate contact therebetween.

- 2. (Original): The hydrocarbon sensor according to Claim 1, where the metal oxide electrode body is formed from $La_{1-x}A_xCrO_3$, where A is selected from the group consisting of Sr, Ca, and Mg, and $0 \le x \le 0.5$.
- 3. (Original): The hydrocarbon sensor according to Claim 2, where A is Sr and x=0.2.
- 4. (Original): The hydrocarbon sensor according to Claim 1, where the electrolyte body is yttria stabilized zirconia with a porosity produced by sintering at a temperature effective to produce a density less than about 81% of theoretical maximum density.

Claims 5-11 (Canceled).
